PROFILE

Versatile and detail-oriented Software Engineer with a solid foundation in Computer Science & Engineering and hands-on experience building scalable applications. Proficient in full-stack development using React, Node.js, and Django, alongside practical expertise in Big Data (Hadoop/HDFS) and Machine Learning. Proven track record of developing RESTful APIs, optimizing database architectures, and deploying responsive user interfaces. Passionate about leveraging traditional, robust engineering principles to solve complex, real-world problems through efficient and clean code.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Python, Java

Frontend: React.js, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, Django (basics)

Databases: MongoDB, MySQL

Core CS: Data Structures & Algorithms, DBMS, OOP, Computer Networks

Tools: Git, GitHub, Postman, VS Code, Vercel, Railway

Keywords: MERN Stack, Full Stack Development, REST API, RESTful APIs, JWT Authentication, Role-Based Access Control (RBAC), CRUD Operations, Machine Learning, Software Developer, Web Development

TRAINING & INTERNSHIPS

AWS re/Start Cloud Trainee, Tata Strive (Jun 2026 - Present)

- Provisioning and configuring core AWS services (VPC, EC2, S3) through hands-on labs, alongside Linux administration and networking exercises.
- Applying cloud architecture, security group, and IAM best practices through project-based coursework in a structured cloud computing curriculum.

Full Stack Web Development Trainee, Teknowgrade Pvt. Ltd (Online) (Feb 2026 - Apr 2026)

- Built dynamic web applications using the Django framework, implementing authentication, backend logic, and database integration.
- Developed responsive user interfaces with HTML, CSS, and JavaScript; gained hands-on experience with RESTful APIs and CRUD operations.

Bootcamp: Blockchain & Big Data Analytics, NIELIT Kolkata (Ministry of Electronics & IT, Govt. of India) (Feb 2026)

- Completed a 90-hour bootcamp under the Future Skills PRIME Project covering blockchain fundamentals (smart contracts, Ethereum, Hyperledger) and Big Data technologies (Hadoop, HDFS, Spark, Hive).
- Applied Hadoop Distributed File System (HDFS) for data storage: created and managed directories, uploaded and retrieved files via command-line operations, and verified service configurations on Linux.

Industrial Training: Machine Learning Using Python, Ardent Computech Pvt. Ltd (Aug 2023 - Sep 2023)

- Learned supervised and unsupervised ML algorithms; performed data preprocessing, feature selection, and model evaluation using NumPy, Pandas, and Scikit-learn.
- Built a basic recommendation system as a capstone project for the training program.

PROJECTS

Fake News Detection (ML) (Jul 2026)

- Built a Fake News Detection classifier using TF-IDF vectorization and Logistic Regression, following a stratified 70:10:20 train/validation/test split with fixed random seeds for full reproducibility.
- Achieved 98.57% accuracy, 98.63% F1-score, and 0.999 AUC-ROC on an unseen test set of ~9,000 news articles.

E-Commerce Web Application (Full-Stack) (2026)

Live Demo: ecommerce-frontend-production-8d98.up.railway.app

- Built 40 REST API endpoints across 11 route modules (auth, products, orders, cart, reviews, admin, payment, and more), backed by 8 MongoDB collections.
- Implemented JWT-based authentication with OTP verification, role-based access control (RBAC) for admin/seller/buyer roles, and integrated payment processing.
- Wrote automated integration tests covering the complete order flow, from cart creation through order placement and status updates.
- Designed a responsive UI using React and Tailwind CSS, ensuring consistent usability across mobile and desktop breakpoints.

Personal Portfolio, React, Vite, Tailwind CSS (2025 - 2026)

- Designed and built a personal portfolio site to showcase projects, skills, and contact details in a fully responsive layout.
- Achieved a perfect 100/100 Lighthouse score across Performance, Accessibility, Best Practices, and SEO.
- Implemented modern UI design patterns and smooth navigation across multiple sections, including projects, skills, and contact.

Heart Disease Prediction System (ML) (2024 - 2025)

- Built and evaluated 5 classification models (Logistic Regression, KNN, SVM, Decision Tree, Random Forest) to predict heart disease risk from a structured medical dataset.
- Achieved up to 82% accuracy with Logistic Regression and Random Forest (100 estimators), the top-performing models after hyperparameter tuning and comparison across algorithms.

Movie Recommendation System (ML) (2023 - 2024)

- Built a content-based movie recommendation engine using Python, applying cosine similarity across the TMDB dataset of ~5,000 movies.
- Performed data preprocessing and feature extraction on movie metadata to generate personalized recommendations based on user preferences.

Full details for all projects, including Hadoop File System Management (HDFS) and a Joke Generator app (React, Vite, Joke API), available on portfolio site above.

EDUCATION

B.Tech, Computer Science & Engineering, Future Institute of Engineering and Management (MAKAUT) (2021 - 2025-26)

CGPA: 7.56

Higher Secondary (Science), Kendriya Vidyalaya Fort William, Kolkata (CBSE) (2021)

76.00%

Secondary, Kendriya Vidyalaya Fort William, Kolkata (CBSE) (2018)

61.20%

CERTIFICATIONS

- Advanced Software Engineering Job Simulation, Walmart Global Tech (via Forage) — Advanced Data Structures, Software Architecture, Relational Database Design, Data Munging
- Full Stack Web Development Certification, Teknowgrade Pvt. Ltd
- Industrial Training Certificate, Machine Learning Using Python, Ardent Computech Pvt. Ltd
- The Complete Oracle SQL Certification Course, Udemy (16.5 hrs)
- Bootcamp Certificate, Blockchain & Big Data Analytics, NIELIT Kolkata (Govt. of India)
