

ML Internship Program – Application Form (Learn Depth)

Welcome to the **ML Internship Program application!** This is a **6-week hands-on, mentor-led internship** where you'll go from basic Python to building and deploying a real machine learning project – **no prior ML experience required.**

What you'll get: **1:1 mentorship from industry ML engineers**, weekly hands-on projects, **Unpaid, an official certificate**, and a shot at a Pre-Placement Offer (PPO) based on performance and Further stipend based opportunities.

Please fill out the form below accurately. Shortlisted candidates will be contacted via email/phone for the next steps (screening test). The entire process takes about 5–7 minutes.

Note: Applications are reviewed on a rolling basis – apply early as seats are limited to 25 interns per cohort.

ML Internship Program – Application Form (Learn Depth)

Why do you want to join this ML internship? (In Short Words) *

I want to solidify my Machine Learning foundation through hands-on, mentor-led projects. Having already built ML models like a Fake News Detector (98.5% accuracy) and a Heart Disease Prediction system, I'm eager to learn industry-level deployment skills, collaborate with experienced ML engineers, and work toward a potential PPO.
